Topic title

Please answer the following questions by ticking the right box on the five-point grading scale, where 1 represents a poor grade or »I disagree« and 5 represents an excellent grade or »I fully agree«.

inadequate.....excellent

	1	2	3	4	5
1. How apparent are the initial problems that the candidate intends to address in the doctoral thesis?					
2. Does the proposed doctoral thesis topic fall within the scope of computer and information science?					
3. Can the submitted topic be the subject of scientific research and does it give the candidate ample opportunity to provide scientific contributions for a narrow field of science?					
4. Are the proposed research contributions duly justified and motivated?					
5. Is the proposed methodology consistent with the expected contributions to science?					
6. Does the thesis proposal include a critical comparative analysis of the literature in the field which the candidate intends to research?					
7. Does the thesis title correspond with the presumed content?					
8. Is the candidate qualified to carry out research work in the proposed area? ¹					

How do you evaluate the proposed doctoral thesis topic?

POSITIVE

WITH RESERVATIONS

NEGATIVE

¹ If the candidate's higher education is in a field which is not computer or information science, then the committee members need to assess whether the candidate has satisfactory background knowledge (e.g. completed the Selected Topics in Computer and Information science course of the doctoral studies).

Proposed area:

Proposed supervisor:

Proposed co-mentor (if applicable)

Co-mentor justification

(A co-mentor can be proposed if the doctoral thesis topic is interdisciplinary. Exceptionally, a co-mentor can also be appointed if the mentor is not full-time or half-time employed at the University of Ljubljana).

Provide a brief commentary evaluation of the proposed doctoral thesis topic.

Ljubljana

Signature

Please submit the completed expert opinion form to the President of the Committee.
