I. General Provisions

Article 1

With these rules and regulations, the Faculty of Computer and Information Science (hereinafter: FRI) governs the selection and application of study programme courses, together with assessment and evaluation, progression through the programme and the completion of 1st and 2nd levels study programmes.

Article 2

These rules and regulations complete and set out precisely the provisions of the Study regulations of the University of Ljubljana, the Statutes of the University of Ljubljana, the Higher Education Act and the Disciplinary Responsibility of Students Regulation of the University of Ljubljana. For matters not specified in these regulations the provisions of the UL Study regulations, the UL Statutes, the Higher Education Act and the Disciplinary Responsibility of Students Regulation of the University of Ljubljana shall apply.

The implementation and assessment of study subjects in interdisciplinary study programs are specifically defined by the rules of the Faculty that implements the subjects.

II. Choice of Curriculum and Successful Completion of Courses

Article 3

Choosing and enrolling in study courses Courses at FRI are divided into:

- Mandatory courses
- Specialized elective courses chosen by the student from a list, forming an integral part of the accredited study programme, and
- General elective courses chosen by the student from the course list available on enrolment or, on the basis of a form submitted to the Student Affairs Office (hereinafter: Student Affairs) and approved by the Vice Dean for Education, from courses on other study programmes at the UL.

Students enrol in elective courses from their curriculum by selecting a course on enrolment in a higher study year or upon approval of their application for taking exams of a higher year in advance (Attachment 1).

As a rule, students are not allowed to select or enrol in courses from a higher level of the study programme. Any exceptions are approved by the Vice Dean for Education, based on the student's application.

Article 4

Changing courses

During the study programme, students may change elective courses up to and including the Friday in the 3rd week of the course when they first take the course, or in exceptional cases (e.g. in the event of a course not being offered or being cancelled).

Article 5

Recognition of individual completed courses from other study programmes

Students who have completed a course at a different higher education institution with a study content similar to one of the courses in their study programme, can at the time of enrolment or at the time of transfer from another institution fill out an application for recognition of the course and submit it to Student Affairs. The application must be submitted together with the course syllabus containing information on the credits of the course, or with a website address where this information can be found, along with the original copy of transcripts containing the information on the date and grade of the completed course.

As a rule, courses in specialized fields of computer science taken in study programmes from other fields of study are not recognized.

The application for course recognition (Attachment 3) is examined by the course lecturer, who must decide within thirty days if the course and its assessment can be recognized, partially recognized, or not recognized. If the course is partially recognized, the lecturer must also state the study content of the differential exam. The lecturer's decision must be based on content, proficiency level and course credits. If the course is fully recognized or if the candidate has successfully completed the differential exam, FRI Student Affairs registers the grade in its electronic records.

Article 6

Recognition of study requirements completed during semesters abroad

Students who have participated in various exchange programmes at foreign universities or higher education institutions where they completed a part of their study programme are, in accordance with the UL regulations and the FRI exchange programme regulations, subject to the recognition process of study requirements corresponding to the ECTS credit system of the specialized courses taken on their exchange programme.

The recognition is approved by the Committee for Study Affairs (hereinafter: Study Committee) upon the proposal of the international exchange programme coordinator.

Article 7

Recognition of general elective courses

Study requirements completed in different study programmes that do not correspond to the specialized courses of the study programme in which the student is enrolled at FRI can be recognized as general elective.

Article 8

Tutorials and weekly requirements

In accordance with the rules of the study programmes, tutorials, including regular weekly work (homework, seminars and tests), are a mandatory part of study. The validity of the completed tutorials and other continuing requirements expires at the end of the academic year. This means that students who do not complete a course in full must repeat the tutorials the following year and once again regularly submit all coursework. An exception can be made (due to absence caused by reasons beyond one's control, such as medical reasons) by the course lecturer, who can propose the recognition of tutorials and continuing coursework on the basis of the student's work done in his/her previous years of study. In this case, the recognition of 4 study requirements in the first and second cycles must be confirmed by the Vice Dean for Education, and in the third cycle by the Vice Dean for Research.

Repeating students pass the subject under the same conditions as students who progress normally. Students who in a given academic year are not enrolled as regular students, but wish to be able to complete the study requirements for some of their individual courses, must report to FRI the courses they intend to complete before the start of each academic year. The completion of study requirements (tutorials and exams) is duly charged according to the valid price list.

Article 9

Taking exams in advance

First- and second-cycle students who have fulfilled the conditions for repeating a year and who are enrolled in study programmes coordinated by the FRI shall be allowed to take a certain number of courses in the following academic year in the upper year of the same programme. The possibility of taking examinations in advance is made available in the enrolment system.

Students with active status, who have already completed part of the requirements at the time of enrolment in the first year shall be allowed to take the following:

- courses worth 30 ECTS from Year 2, if they completed 48 ECTS in Year 1;
- courses worth 18 ECTS from Year 2, if they completed 42 ECTS in Year 1;
- courses worth 6 ECTS from Year 2, if they completed 36 ECTS in Year 1.

Students with active status, who have already completed part of the requirements at the time of enrolment in the 2nd year shall be allowed to take:

- courses worth 36 ECTS from Year 3, if they completed 108 ECTS in Year 1 and 2;
- courses worth 24 ECTS from Year 3, if they completed 102 ECTS in Year 1 and 2;
- courses worth 18 ECTS from Year 3, if they completed 96 ECTS in Year 1 and 2.

For students on interdisciplinary study programmes not coordinated by the FRI, the study regulations of the member coordinating the study programme shall apply.

The number of applications for each course in each academic year may be limited in accordance with the Faculty's space and staffing possibilities. The above criterion also applies to repeat students who have not completed the study requirements for the course in question as part of their regular study requirements (if the quota for a previously selected course is already occupied at the time of enrolment, the student must choose a new course to take).

Students who take courses in advance do not have their timetable adjusted separately. It is also the student's responsibility to pre-select courses that will be compatible with their future programme of study (e.g. modular courses), as the student information system does not provide all possible checks in this case (for the sake of later choice). When a student is pre-authorised to take a course, he/she also commits himself/herself to definitely taking it in order to complete his/her studies (in spite of any inconsistency with his/her later choices). A student may otherwise change his/her course in accordance with Article 4 of these Regulations.

III. Assessment and Evaluations

Article 10

Course assessment at FRI is in the form of continuing work (homework, projects, presentations, seminars, tutorials, tests) and exams (course exams, final diploma and Master's exams, differential exams).

In all forms of assessment, the candidate must use only the tools explicitly allowed by the course coordinator. Plagiarism in course assessments can be verified by electronic and technical means.

The final course grade is composed of continuing course assessment and the final course assessment grade as defined by the study programme. For a positive final course grade, the student must successfully complete both the continuing and the final assessment of the knowledge. Student obligations for individual courses should be set in advance, while the course lecturer should ensure that they are known to students at the start of the course.

Article 11

Plagiarism and disciplinary responsibility

All forms of cheating in exams or coursework are a serious breach of study obligations and are dealt with according to the procedure established by the Disciplinary Responsibility of Students Regulation of the University of Ljubljana (hereinafter: UL disciplinary rules).

The Student Disciplinary Committee at FRI conducts the disciplinary action process and imposes relevant measures. Any employee or student at FRI can initiate a process with the Dean or Vice Dean for Education. The process for establishing liability is then initiated at the request of the Dean or Vice Dean for Education.

Penalties for serious misconduct in the form of exclusions shall be imposed by way of prohibiting the student from taking an exam for a period of time determined by the Student Disciplinary Committee.

Article 12

Continuing assessments

Continuing assignments for individual courses must be distributed throughout the semester and must be completed at the latest by the end of lectures and tutorials, and before the examination period.

Coursework must be evaluated duly and the results must be posted on time. The final continuing assessment grades must be conveyed as a rule before the end of lectures and tutorials.

Article 13

Final examination

The final assessment of knowledge is carried out in the form of examinations. The examinations will be of the following types:

- course exams,
- differential exams,
- a bachelor's degree exam,
- the master's exam.

Article 14

The course examination may be written and/or oral. It can only be taken by students who have completed all the necessary requirements of the course, and who have applied for the examination on time.

The differential examination is to be taken by the student, before transferring to the study programmes of which UL FRI is the parent institution and provider.

The Bachelor's degree examination is the final form of assessment of a student's competence in a first cycle study programme. The form and manner of said examination at the FRI are specified in the Regulations on the Bachelor's Degree Examination of the Faculty of Computer Science and Informatics of the UL.

The Master's examination is the final form of assessment of the competence for students of a second cycle programme. The form and manner of the Master's examination at the FRI are determined in the Regulations on the Master's Thesis of the Postgraduate Study Programmes of the Faculty of Computer Science and Informatics of UL.

15. člen

Examination periods and issuing of exam dates

The exam dates are provided along with the academic calendar for the academic year in progress, which is divided into three examination periods:

- the winter examination period: after the end of the lectures and tutorials of the winter semester,
- the summer examination period: after the end of the lectures and tutorials of the summer semester,
- the autumn examination period: before the start of the lectures and exercises of the winter term of the following academic year.

For each course, three regular examination dates will be issued during the academic year. For each course in the winter term, two examination dates will be scheduled in the winter term and one in the autumn term. For each course in the summer term and for each year-long course, two examination dates will be scheduled in the summer term and one in the autumn term. The dates of the regular examination periods will be published at the beginning of the academic year.

Article 16

As a general rule, there will be no additional examination dates for course exams. Additional dates may be scheduled exceptionally, for example for courses which are held in a block or outside semesters. Said dates will be announced by the Student Registry. The students will be made aware of the dates in good time.

Differential examinations are to be held only on the regular examination dates.

Article 17

Schedule of regular examination periods

The timetable of regular exam dates must be arranged in such a way that the student does not have to take more than one exam of the year of study in which he/she is enrolled in per day. In addition, the timetable of exams is to be arranged in such a way that

- there is a gap of at least 10 days between the first and second exam date of a certain course,
- the examination dates of mandatory subjects do not overlap with the examination dates of other mandatory subjects in the same year.

The timetable of exams is obligatory for students as well as for the course holders. The date of the examination may be changed only in justified cases, for example due to the absence of the teacher. Students must be informed of any such change at least 10 days before the original examination date.

Article 18

Taking exams at an earlier date may be permitted, at the request of the student, by the Vice-Dean for Educational Activities in agreement with the teacher in charge of the course, if there are justified reasons (departure for study or study practice abroad, hospitalisation during the exam period, childbirth, attendance at a professional or cultural event or a top-level sports competition, etc.) and if, in the light of the applicant's performance in the past studies, he/she considers such permission to be reasonable.

Article 19

Registration and deregistration

Students must register for each course exam within the required time limit via online study information system. The deadline for registering for exams is 23:59, two days before the day of the exam. After the deadline, it is no longer possible to apply to the exam. If the information system does not work on the last day of the registration period, the registration period will be extended accordingly. The teacher may only admit those students who are on the list of registered candidates.

Deregistration via the online study information system is possible within the deadline for registration for the exam. Later, the student may only request to withdraw with the assistant or teacher before the start of the exam, when he/she has not yet seen the exam questions, or before his/her turn on the oral examination if the exam is oral only. The teacher or teaching assistant will be obliged to enter the details of such withdrawn candidates in the online information system or to communicate them in writing to the Student Office no later than the next working day after the written examination, (or the written part of the subject examination), or the next working day after the scheduled oral exam if only the oral part of the subject examination is to be taken.

If a student is unable to attend an examination due to force majeure or is unable to withdraw for the same reason, he/she shall be deemed to have withdrawn on time.

A student who fails to sign out and to attend any part of a subject examination and has no justifiable reason for failing to do so will receive a failing grade.

Article 20

Publication of exam results

The results of the written part of the exam are to be published no later than 7 days after the exam. The student has the right to consult his/her assessed paper.

The result of the oral exam will be published immediately after the examination.

The exam papers of each student for each study unit will be kept for 30 days after the publication of the grade, if the student does not object to the grade, otherwise until the end of the grade objection procedure.

The date of completion is the date on which the grade is entered in the official register.

Article 21

Students with disabilities may apply for special arrangements for taking the exams, depending on the type and degree of their disability. A student wishing to be granted the status of a student with special needs must, at the time of enrolment, submit an application for such status, together with the relevant opinion of the Committee for the Categorisation of Children and Adolescents with Mental and Physical Disabilities or the opinion of the Disability Committee. The student's disabilities and special needs must be clear from the statement.

The request is evaluated by the Committee for Student Affairs. Before the decision is issued, the student is interviewed to clarify the nature of the problems and obstacles, i.e. the impact of the problems on the student's performance of his/her studies. The interview is conducted by the coordinator or tutor for students

with special needs at the Faculty of Computer science and Informatics, who proposes the student's accommodations to the Committee for Student affairs for approval.

The student will normally be granted the status of student with special needs for the entire duration of the course, but may be granted for a shorter period depending on the extent and duration of the difficulty. The coordinator or tutor for students with special needs at FRI monitors the work of students with special needs status and reports to the ACS at the end of each semester.

The student may be granted special exemptions in accordance with the current Regulations on Students with Disabilities of the UL and the Statutes of the UL.

The Student Office is responsible for informing the course providers about the students who have been granted the status of a student with special needs in accordance with the decision of the Committee for Student affairs, and about the exemptions and special conditions granted to them.

Article 22

The status of student athlete may be claimed by those students who, on the basis of the categorisation of the Olympic Committee of Slovenia - Association of Sports Federations (OKS), have obtained one of the following titles: meritorious athlete, world-class athlete, international-class athlete, perspective-class athlete, national-class athlete or junior-class athlete.

To obtain the status of student athlete, the student must submit an application to the Committee for Student Affairs, accompanied by evidence of categorisation by the Olympic Committee of Slovenia.

The Committee for Student affairs decides on the application at its first following meeting and approves the special conditions of education. The possible special conditions are:

- excused absence from mandatory rehearsals and lectures, which the student was unable to attend due to his/her sport and competition commitments,
- the taking of an oral examination within the exceptionally fixed time limits agreed with the course provider,
- the taking of written examinations within the exceptionally fixed dates agreed with the course provider, but only in exceptional cases where the student is unable to attend at least half of all the regularly scheduled dates due to sporting and competitive commitments,
- early sitting of examinations, if possible,
- assistance in balancing the study and sports/competition timetable (attendance at rehearsals with other groups).

On the base of the decisions of the Committee for Student affairs, the Student Office is responsible for informing the course providers about the students enrolled as student-athletes and about the benefits granted to them.

Article 23

Evaluation

Success in a course is assessed as specified in the course syllabus, which is an essential part of the accredited study programme.

The grades must be known and available within 7 working days from the date of the last part of the examination (if the examination consists of several parts, e.g. written and oral). The examiner must enter the grades in the electronics system no later than 5 working days from the date of the results publication.

The teacher can agree with the candidate to carry out part of the course requirements at a later date. The teacher is obliged to finalise the grades of all students who have taken the course in the current academic year within 30 days of the examination date.

Students who have sat a written exam must be informed of the exam results no later than the seventh working day after the examination.

Article 24

If a candidate withdraws during the examination, he/she shall be marked negatively. The teacher or assistant responsible for the written examination or the written part of the examination is responsible for verifying the presence and identity of the candidates. The candidate must provide official photo identification. A candidate who registers for the exam and fails to take it shall be marked "no-sit".

After the examination, the candidate is obliged to hand in his/her work for assessment, even if he/she is sure that he/she will not achieve a passing grade. If a student fails to do so, he/she will be deemed to have withdrawn from the examination, in which case he/she will be given a failing grade.

Article 25

Appeals against examinations

A student who believes that he/she has been unfairly graded in an examination may, within three working days of the grade being published, submit an appeal against the grade to the Dean.

Article 26

Retaking of the exam

A student who has failed an exam may repeat the examination. Unless otherwise provided for in the Statutes of the UL, a student may repeat an exam three times. The exam may be retaken within the same examination period, however, more than 10 days must elapse between the failed exam and the retaking of the exam. A retake of an examination on the basis of a successful appeal against an examination grade is not considered a retake.

In extreme cases, where a student has a valid reason, he/she may apply to the Committee for Student affairs for a fourth retake (fifth attempt) of the subject examination. Before the fifth sitting of the examination, the student must attend an interview with the course provider, who will confirm the student's request on the prescribed form (Annex 7). The student must submit the signed form to the Student Registrar's Office no later than 30 days before the examination date.

A student who fails to pass the examination even at the last possible opportunity, in accordance with the UL Statutes, may not complete his/her studies in this study programme, but may fulfil other study obligations under the programme in which he/she is enrolled until the end of the current academic year. A student may not re-enrol in the same year of this programme in subsequent academic years, nor may he/she be promoted to a higher year in this programme.

If a student is re-enrolled in the same year, he/she is deemed to be taking a particular exam in that year for the first time when he/she takes that exam for the first time after re-enrolment, regardless of whether he/she had already taken that exam when he/she first enrolled in that year.

The fourth and fifth time the student takes the examination, he/she will be examined by a board composed of at least two members. In the written exam, the work is examined by the board, and in the oral exam, the work is examined in front of the board. The board is appointed by the Vice-Dean for Teaching. The course holder is obligated to deliver a signed record of the board examination, signed by both members present (or all members present if there are more than two), to the Student Registrar's Office no later than one week after the end of the board examination.

The student shall be liable for the costs of these examinations in accordance with the current price list.

Article 27

Correction of a grade

A student who has obtained a passing grade in an exam may withdraw the grade within 7 days of the publication of the results of the exam. In this case, the grade will not be entered.

A student who has already passed an examination in a particular unit of study but wishes to obtain a better grade may retake the exam once before the end of his/her studies. If a student wishes to improve a grade in a subject that is not included in the course of the current academic year, he/she must retake the current study requirements in accordance with the course syllabus. A student may improve his/her grade in a maximum of three subjects during the course of studies in which he/she is regularly progressing.

In the event of a retake of the examination referred to in the previous paragraph, the higher grade will apply, and the grades of both retakes will be entered in the record.

A student will not be permitted to make up a passing grade in an examination in which he/she has been unsuccessful more than twice.

IV. Advancement to a higher year and re-enrolment

Article 28

A student may be enrolled in a higher year of study once he or she has completed the study requirements to a sufficient extent according to the accreditation of the study programme.

Article 29

In accordance with the Statutes of the UL and the FRI Rules on Enrolment in an Upper Secondary Year and Repeating a Year in Exceptional Cases, a student may enrol in an upper secondary year or repeat a year under exceptional conditions. The decision is taken by the Committee for Student affairs .

Article 30

A student who has not completed all the requirements laid down in the study programme for enrolment in a higher year may repeat the year in which he/she is enrolled, provided that he/she fulfils the conditions for repeating the year set out in the study programme and in the Act on Higher Education.

A student who has not repeated a year may enrol in an additional academic year (graduate internship).

V. Completing studies

Article 31

The last act of a student in FRI first cycle programmes is the Bachelor's degree examination. The form and manner of the diploma examination is regulated by the Regulations on the Bachelor's Degree Examination of the Faculty of Computer Science and Informatics of the UL.

The last act of a student in the FRI postgraduate programmes is the Master's examination. The form and manner of the Master's examination are regulated by the Regulations on the Master's thesis in the postgraduate study programmes of the Faculty of Computer Science and Informatics of UL.

Article 32

The production of the final thesis of the bachelor's degree programme, which is submitted by the student in electronic form together with a declaration in accordance with Article 131 of the Statutes of the UL, is laid down by the FRI in its internal regulations. The student submits the electronic form of the written thesis in the study information system.

The production of the final thesis of the Master's degree programme, which the student submits in electronic form together with a declaration in accordance with Article 131 of the UL Statutes, shall be laid down by the FRI in its internal regulations. The student submits the printed electronic form of the master's thesis in the study information system.

Article 33

Each final thesis of the UL studies in electronic form is checked for similarity of content with other works by means of the software for checking similarity of content, which is linked to the FRI study information

system. When submitting the written final thesis, the student gives his/her consent to the use of the electronic form of the written final thesis for the checking of similarity of content.

In accordance with the Regulation on the verification of the similarity of the content in the electronic form of the written final thesis and the conditions for the temporary unavailability of the content of the written final thesis, the content of the printed and electronic forms of the written final thesis may be exceptionally unavailable for a certain period of time.

Article 34

In the case of Bologna first-cycle and second-cycle study programmes, the success of the studies is assessed by:

- the average grade of all the courses assessed on a scale of 5-10, using a simple average, first at the level of the course (if the course has more than one grade) and then at the level of all the courses; the average grade is rounded to one decimal place,
- an overall mark for the final thesis and its defence on a scale of 6-10.

The diploma grade shall not be included in the grade point average for the diploma attachment.

Article 35

A student who fulfils all the requirements of a first- or second-level study programme and passes the bachelor's or master's examination will be awarded the appropriate diploma. The form of the diploma certificate and the procedure for its issue is regulated by special regulations of the University of Ljubljana.

VI. Final provisions

Article 36

These Rules of Procedure hereby cancels the Rules of Procedure (adopted on 11 September 2012, as amended on 12 March 2013, 11 June 2013, 3 June 2014, 11 November 2014, 14 April 2015, 8 September 2015, 8 September 2016, 8 March 2016, 13 September 2016, 10 January 2017, 19 September 2017, 3 September 2019, 14 June 2022 and 22 November 2023). These Rules of Procedure, which were established at the 31st Ordinary Session, 11 June 2024, are in force as from 1 August 2024.

Number: 011-2/2024-2

Date: 11.6.2024

Assoc. Prof. Dr Mojca Ciglarič
Dean
